***Response to Amendment***

1. Applicant's amendment and arguments of April 11, 2006 are acknowledged and entered.
2. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "said roll." There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
6. Claims 1, 2, 4, 7, 9, 10 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Farley.

Farley shows an apparatus and method of stopping and extinguishing forest fires comprising the steps of erecting at least one substantially vertical wall 401 wherein the wall is of a fabric fire-resistant material, unrolling a roll of the fabric so as to erect the wall and configured so that when a forest fire reaches the wall it can be stopped and

Art Unit: 3752

extinguished, supporting the at least one wall on a plurality of supports extending over a whole height of the at least one wall (see Figures 18 and 19). Once the wall is erected, the fire can be extinguished by conventional means which includes bringing vegetation to the ground and applying anti-fire foam onto the vegetation.

***Claim Rejections - 35 USC § 103***

7. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

8. Claims 8 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Farley.

Forming at least one trench and placing the wall in the at least one trench would have been a matter of operator choice, since it involves the mere placement of a known apparatus in which the mere placement of a known apparatus is generally recognized as being within the level of ordinary skill in the art.

***Conclusion***

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3752

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
